solar radiation data manual for buildings - nrel

for use by architects and engineers, the solar radiation data manual for buildings provides solar resource information for common window orientations for the united states and its territories. this information was modeled using solar radiation and meteorological data gathered from 1961 to 1990 and will permit quick evaluations of passive solar and daylighting features for buildings. this

handbook of solar radiation data for india

the book handbook of solar radiation data for india by anna mani in 1980 was the first comprehensive document that provided this data for many stations in india.

solar energy : an introduction pdf - download books

a chapter considering solar radiation, basic principles applied to solar energy, semiconductor physics, and light absorption brings the reader on equal footing with the technology of either solar generated electrical current or useful heat. details of how a solar cell works and then production of current from a photovoltaic device is discussed. characterization of a solar cell is
